Sai Chand Olupalli

|+91 6281604742 |saichanduvlk@gmail.com |LinkedIn | Vijayawada, Andhra Pradesh

PROFESSIONAL SUMMARY

Skilled Data Analyst with expertise in data analysis, visualization, and reporting. Proficient in Python, SQL, Power BI, and Tableau. Experienced in developing actionable insights, cleaning and analyzing data, and creating interactive dashboards and reports to drive business decisions.

EDUCATION

KBN College, Vijayawada. Oct 2022 - July 2024
Masters in Computer Applications (MCA) CGPA: 8.34
AG & SGS Degree College of Arts & Science, Vuyyuru. Aug 2019 - June 2022
B.Sc. (MPC's) CGPA: 8.46

PROJECTS

Electric Vehicle (EV) Market Size

Analysis Description:

I analyzed a dataset of electric vehicle (EV) registrations to study market trends and predict future growth. The goal was to provide insights for planning infrastructure and production, while understanding the market's regional distribution and expansion.

Key Contributions:

- Cleaned and processed the data, addressing missing values to ensure high-quality analysis.
- Conducted exploratory analysis to identify key trends in EV registrations by model, make, and location.
- Created visualizations (bar charts, line plots, geographical maps) using Python libraries like Pandas, Matplotlib, and Folium to present insights on EV adoption.
- Applied linear regression to forecast future EV growth, providing actionable insights for infrastructure and production planning.

Tools and Technologies:

Python, Pandas, Matplotlib, Seaborn, Plotly, Folium, Scikit-learn.

Sales Performance Dashboard - (Adventure Works Dataset)

Description:

Designed and developed a comprehensive dashboard to analyze sales performance, customer behavior, and product trends using Excel, Power BI, and Tableau. The dashboard provided interactive visualizations, enabling stakeholders to drill down into sales by region, product category, customer segment, and time period to drive data-driven decision- making.

Key Contributions:

- Used Excel for initial data cleaning, transformation, and preparation before importing data into Power BI and Tableau.
- Built interactive Power BI and Tableau dashboards to visualize sales performance and customer behavior, with drill-down functionality by region, product category, and customer segment.
- Proposed actionable insights and strategic recommendations to enhance sales effectiveness, customer satisfaction, and optimize product offerings.
- Tackled challenges in handling large datasets and creating a consistent data model, ensuring accurate reporting by integrating multiple tables and addressing data discrepancies.

Tools and Technologies:

Excel, Power BI, Tableau.

Online Fake Logo Detection System Mar 2024 – May 2024

Description:

Developed a CNN-based system to effectively detect fake logos, enhancing brand protection by distinguishing original logos from imitations.

- **Project Type**: Developed a Convolutional Neural Network (CNN) model using Python in Google-Colab and supports Windows 8/10 system with GPU acceleration.
- **Layers Used**: Included Conv2D, MaxPooling2D, Dropout, and Batch Normalization layers.
- **Training Data**: Trained on 12,400 grayscale images resized to 256x256 pixels.
- **Objective**: Accurately distinguished between original and counterfeit logos.
- **Accuracy**: Achieved high accuracy through Intensive training and validation on a weighted dataset.
- **Evaluation Techniques**: Used visualization and predictive analysis on test images to ensure reliable logo detection performance.

SKILLS

Programming Languages: Python.
Database: MySQL.
Visualization Tools*:* Power BI, Tableau.
Front-End: HTML, CSS, JavaScript.
Microsoft Office Suite: Word, Excel, PowerPoint.
Core Competencies: Data Visualization, Data Analytics.
Soft Skills: Communication, Time Management, Teamwork, Multi-tasking.

CERTIFICATES

- Data Engineering(Sri Sathya Sai Skill Development Center) July 2025 – Nov 2025
- Data Analytics (Fixity EDX) April 2024 – Nov 2024
- INDIANSERVERS Mar 2024 - May 2024
- Python Fundamentals for Beginners June 2023 – June 2023
- Front End Development- HTML Aug 2023 – Aug 2023
